

International Conference on Microchimerism

May 27 - 28, 2026
Medical University of Graz

Welcome to GRAZ

Sessions

- » Past, Presence, Future - Microchimerism across disciplines
- » Reproduction I
- » Transplantation
- » Immunology I
- » Keynote Lecture
- » Immunology II
- » Reproduction II
- » Evolution

Speakers

Diana W. Bianchi, USA
Amy Boddy, USA
Will J. Burlingham, USA
Michael Eikmans, The Netherlands
David Haig, USA
Whitney Harrington, USA
Natalie Lambert, France
Dennis Lo, China - Keynote
J. Lee Nelson, USA
Henriette Svarre Nielsen, Denmark
Eitan Okun, Israel
Annetine Staff, Norway
Anne M. Stevens, USA
Sing Sing Way, USA

Microchimerism?

The interdisciplinary dimension of microchimerism research is the central interface between immunology, genetics, transplant medicine, cell biology and other related disciplines.

Future?

The conference offers a platform to discuss the functional significance of microchimerism and discover new research perspectives.

Communication!

Take advantage of this opportunity to exchange ideas with leading scientists in this field and actively shape the future research agenda.
